

# Benefits of an efficient phone system

## Advantages for your business:

- Cloud based telephony solution with no onsite server hardware
- Scalable for every size business by increasing licensing
- Can create professional messaging and call routing

- Handsets can plug into a network anywhere in the world for remote workers
- Rent handsets at an extremely cost effective rate

- Mobile app allows you to operate anywhere in the world (subject to WIFI or 4G)

## Pro's for you and your employees:

- Programable to achieve hold, line transfer, hold music and voicemail management
- Transfer calls to colleagues with simple button push system
- Adaptable to your company structure
- Take a call on speaker or through a headset. Do not disturb and mute settings available
- Higher efficiency calls and quality sound to enable clearer conversations
- Creates personable working environment
